

# cloud:LINK BIZNIS AKTOVKA

Telecommunication services for your business

- modern and comfortable cloud data storage
- access files anytime, anywhere
- superior security

## Provide your company teams with cloud:LINK BIZNIS AKTOVKA data storage

Your employees need a simple, flexible and secure storage and sharing tool for their tasks and collaboration.

Provide your company, teams and projects with modern and flexible data storage for files and documents.

All employees will get their own user accounts, through which they can access their own files and files shared with them that are securely stored on the state-of-the-art Slovanet cloud platform, all via web interface and mobile or desktop applications.

## Simple and comfortable use

The use of the **cloud:LINK BIZNIS AKTOVKA** interface will be similarly simple and familiar as the one you use at the moment: With simple mouse dragging you can save files of any type and size from your computer, sort them into folders, synchronize them, share them with other users, and access them also through your smartphone. And that's just the beginning.

## Team collaboration and productivity tool

- Supports secured user collaboration thanks to file sharing in closed environment.
- Files can be shared not only with individual users, but also with user groups within your Biznis Aktovka or anyone outside of it.
- Shared files can be protected with a password and with adjustable expiration.
- Supports file versioning.
- Files and their changes can be commented.
- The file tagging feature significantly improves sorting and searching by specific criteria.

## You will get above-standard security

Despite high simplicity and comfort, **cloud:LINK BIZNIS AKTOVKA** provides extra high security: encrypted data transfer without the need of VPN access configuration, the ability to enable server side file encryption and your data do not even leave the Slovak Republic.

For sharing outside of a closed group, the above mentioned sharing protection with a password and adjustable expiration is possible. In addition, two-factor user authentication is also supported. In this way, it also helps you to meet the GDPR conditions.

Telecommunication services for your business

## Selected user features

You can store files of any type and size in your Biznis Aktovka and sort them into folders like on a regular computer.

After you have modified a file in your application and re-uploaded it into the Biznis Aktovka, a new file version will be created, so you can go back to a previous version at any time.

Thanks to the desktop and mobile applications, you can synchronize and access the files anytime and anywhere.

You can also take advantage of dozens of additional applications and features to adjust appearance, multimedia, office tools for document viewing, monitoring, and security.

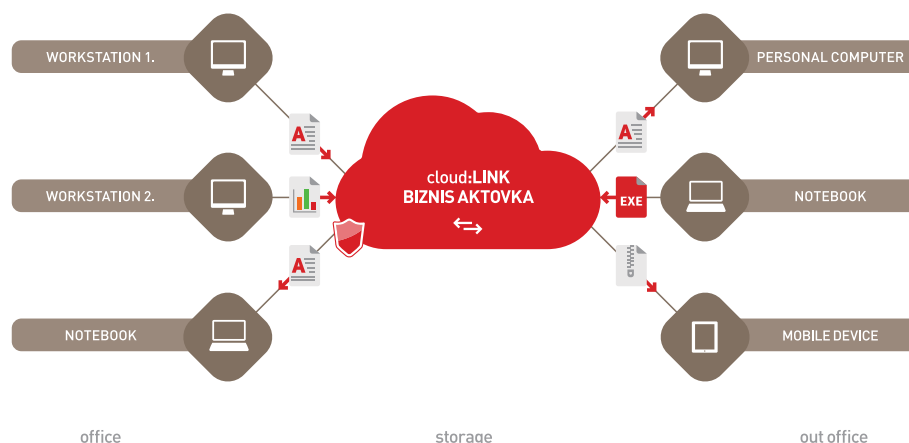

## Advanced options for demanding users

Optional integration with MS Outlook and Mozilla Thunderbird email clients is also available. As a result, only links to files in your Biznis Aktovka are sent within your company instead of bulky email attachments. This significantly saves storage space on servers and individual computers.

For clients with very strict security requirements, it is even possible to fully deploy a Biznis Aktovka on their own infrastructure (on-premise).

## Adjustable to your liking

- The solution is flexible and adjustable according to the number of users, from small offices to corporations.
- The admin account gives you full control over users and settings of the Biznis Aktovka.
- With your logo and corporate colors: You can customize the name of the interface, welcome slogan, interface color and insert your logo.
