

internet:GATE

Telecommunication services for your business

- high stability, capacity and a secure connection
- caring technical support and assistance
- reciprocal use of your infrastructure

Now you will really be connected and share your optical infrastructure

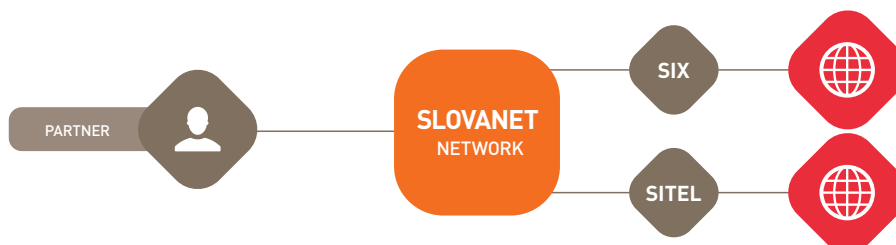

Use our Slovakia-wide backbone network and gain access to the full range of Triple Play portfolio access services. Offer your corporate customers with branches in different cities a complex and effective connectivity solution with integrated care for their data network. Let us know if you have quality, robust and scalable infrastructure and coverage in a large area of your region! Our clients across Slovakia are sure to appreciate the ability to make use of your high capacity data lines.

Quality and reliability

- broadband Internet from one of the largest providers in Slovakia
- high quality connection at an attractive price
- many years of experience with providing services for other operators
- reciprocal use of your infrastructure
- Slovakia-wide coverage
- stable connections 24 hours a day
- the latest fixed line and wireless technologies
- no need to invest in equipment
- continuous technical support and network monitoring

Something more

- can be combined with **x:GATE** services (**voice:GATE**, **iptv:GATE**) to better use bandwidth and technologies
- can be combined with **x:LINK** (**fax:LINK**, **sms:LINK**, **safe:LINK**, **virtual:LINK**, **server:LINK**) to deliver complex services to your VIP clients
- above-standard client care
- wide range of options - from general use to technology intended for work with sensitive applications including iptv, voice and more
