

# internet:LINK

TELECOMMUNICATION SERVICES FOR YOUR BUSINESS

- ✓ high connection stability, capacity and security
- ✓ supportive technical support and helpdesk
- ✓ packages of additional services for efficient work with the Internet

## Be truly connected

The Internet is a standard part of a modern company's operation and the essential tool for everyday work. When choosing a connection emphasis is usually not only on price but more often on especially important connection quality and supplementary services are becoming increasingly important. The sudden breakdown of e-mail communication or a several-hour breakdown of an on-line ordering system is an inconceivable problem for a company. Stability of Internet connection and swift maintenance services represent the added value of the **internet:LINK** service.

## Quality and reliability

- broadband Internet from one of the largest providers in Slovakia
- high connection quality at an excellent price
- long experience with service provision for demanding customers
- accessibility throughout Slovakia
- stable connection 24 hours a day
- up-to-date wired and wireless technologies
- no investments in equipment
- permanent technical support and network monitoring

## Something extra

- the Internet program that suits you best, for a better price
- the option of combination with the **x:LINK** series services (**safe:LINK**, **aero:LINK**, **cloud:LINK**, **server:LINK**, **fax:LINK**, **sms:LINK**) for the more effective management and administration of your business
- above-standard customer care
- wide choice - from standard technologies to technologies designed for sensitive applications
